

If you have a SuiteApp installed since before, please follow there steps to update the SuiteBundle to the unlocked and open version

1. Login as an administrator go to **Customizations->SuiteBundler->Search & Install bundles->List**
2. See if you have a bundle with an **ID matching the list [here](#)** (in the README.m file)
3. If it is a  next to the version number and has the status Managed = YES on any of the suitebundles listed above you can update.

4. **Hold over the green action-button** next to the bundle and **choose “Update”** in the drop down menu

- Do not alter any settings in the update step. Just updating it will not affect any of your current report you have setup or use. Click **Update Bundle**

**Preview Bundle Update**

Cancel Update Bundle

- Click **OK** of the warning prompt in NetSuite:

tstdrv2375992.app.netsuite.com says

This will update the bundle's full contents to match the latest version from the bundle author.

**WARNING:** incompatible changes made to custom records and fields may cause data you've entered to be deleted.

You might want to back up such data before updating. Proceed?

OK Cancel

- The App will now install – once finished your version will be the latest and Managed = No.
